THINK JACKS - THINK **EDMO**

WHY PARTNER WITH EDMO?

LIFTING HEAVY EQUIPMENT WITH CONFIDENCE

EDMO delivers engineered jacking solutions that keep heavy equipment moving safely and efficiently. From design to on-site servicing, we provide end-to-end support with Australian-made systems built for harsh conditions and strict safety standards. Backed by 50+ years of expertise, we lead in robust, innovative lifting solutions you can trust.

JACK LIFTING CAPACITY:

Ranging from

50T to 200T

STAND LIFTING CAPACITY:

Ranging from

10T to 200T

We offer **customizable load caps and extensions** with virtually unlimited configurations to suit your machinery, site conditions, and operating procedures. Paired with our **EDMO accessories**, you'll have a complete, safe, and user-friendly solution for all your lifting and support requirements.

OUR MISSION

To engineer world-class jacking and lifting solutions that deliver safety, reliability, and performance in the world's toughest environments. Proudly built in Australia, we support heavy industry with products designed to last, backed by expert service and an unwavering focus on our customers.

OUR VISION

To be the trusted global leader in heavy equipment lifting - innovating safer, smarter, and stronger solutions that move industries forward.

ADVANCED MANUFACTURING

Our manufacturing process is powered by industry-leading technology, ensuring each jack meets our rigorous quality standards. We utilise the latest technology multitasking CNC 5 axis machine and turning centers with high end welding equipment to achieve precise engineering and durability.

EDMO sources high-quality materials from Australian steel suppliers and world leading pneumatic and hydraulic manufactures, ensuring strength and longevity in every jack we produce. Our robust quality control process guarantees that our equipment exceeds industry benchmarks.

VERSATILE LIFTING SOLUTIONS

We offer a wide range of jacking solutions for industries that demand strength, durability, and safety. Whether you're lifting 2T or 200T, EDMO has the right solution for your operation.

Our jacks are designed for adaptability, ensuring seamless integration across various applications. From mining and construction to transport and heavy industry, our products are built to handle the toughest lifting challenges with ease. With operations spanning 22 countries, our lifting solutions are trusted by professionals worldwide.

INNOVATING WITH ADVANCED TECHNOLOGY

At EDMO, we are committed to continuous improvement, developing cutting-edge jacking solutions that set industry benchmarks.

PRECISION ENGINEERING

Every EDMO jack is engineered with precision and built for reliability, ensuring maximum performance under extreme conditions. With a focus on innovation, we continuously refine our designs to enhance efficiency and durability.
